

Dear Mrs. Price,

In connection with the below communication I would like to take this opportunity to introduce myself and the Organization I represent.

My Name is Ian Courtenay and I am a director of the Sunrise Rotary Club of Belize. The main goal of our Club is to assist in the field of education focusing primarily in educational institutions on the south side of Belize City. Currently we are working on a four step project assisting one of two Libraries that serve over 15,000 primary and secondary school children as well as several senior citizen programs. This library is situated in one of the more impoverished areas of our city and has many challenges in its attempt to adequately serve the students and people of the area. We the Sunrise Rotary Club are currently working on properly securing the premises and doing repairs to the present facility. That being said we thought that maybe your organization could help us with the other two aspects of our project. We are trying to upgrade their computer facility which they not only used to allow the children access to the internet but they also made necessary funds by charging a small fee for visa application services and other small business facilities to the community. In this light we would like to assist them with replacing ten very old computers along with at least two business printers. The other needed assistance is reference material and both fiction and non-fiction library books, for children in particular. I do hope that The Sunrise Rotary club and your A Mission of Love Organization will be able to partner in this endeavor and I look forward to hearing from you in the near future to see what collaborative effort can be arranged.

Warm regards

Ian Courtenay
